

Goodyear Fortified Tires Cost Users \$5,000,000 Less

Our last price reduction—made February 1st—will save Goodyear users about five million dollars this year. And that was our third reduction in two years, totaling 45 per cent.

Yet Note This

Yet Goodyear Fortified Tires embody many extras. Five are costly features found in no other tire. The rest are found in few.

If we omitted those extras, we could save on this year's probable output \$1,635,000. We could add that to our profits, yet Goodyear tires would look as good as now.

This year's improvements alone will cost us \$500,000 this year. All to give you ex-

tra wear. And we shall spend \$100,000 on research this year to find more improvements still.

They Are Yours

These extras belong to you. They mean less rim-cuts, less blowouts, less loose treads. They mean more rubber, more fabric, more mileage, less trouble. Most tire users know that, so Goodyear tires far outsell any other.

Prove it yourself this summer. It will bring you tire contentment.

Any dealer, if you ask him, will supply you Goodyear tires.

Men are now adopting Goodyear tires faster than we can supply them. We have never seen anything like it.

REFINERS HOLD LOW RAW STOCKS FOR THIS SEASON

Improvement in Demand Expected Soon, Says Nevins & Callaghan's Market Review

That a backwardness of buying for refiners will soon be a thing of the past is the expectation of Nevins & Callaghan of 90 Wall Street, as expressed in their Sugar Market Review of September 3. The review follows, in full:

The market opened steady in tone with Cuban holders generally asking 3 3/4-c basis 96 deg. c. & f. (4.77c), and with small parcels occasionally appearing at 3 1/2-c basis 96 deg. c. & f., at which basis refiners were ready buyers. On August 30th, 3 3/4-c basis 96 deg. c. & f. was obtained for 7500 bags Cuban ahead, advancing the spot quotation temporarily to 4.77c, and about 25,000 bags for first half September was sold at the same price.

When this level was reached the offerings thereat increased to such an extent that refiners withdrew and an easier tendency developed. Holders gradually modified their views but without success, until some 15,000 bags Porto Rico from store found buyers at 4 1/2-c basis 96 deg. c. & f., following which refiners again retired. The market closed very dull with September shipment Cuban offering in fair quantity at 3 3/4-c, and with refiners only bidding 3 1/2-c basis 96 deg. c. & f. (4.59c).

Holders show no disposition to accept this latter price, however, as it is generally recognized that refiners' stocks of raws are extremely low for this season of the year. Although refiners' stock of refined are larger than usual, September is almost invariably a month of large distribution and it is confidently expected that the long continued backwardness in the demand will soon show some improvement.

The weekly cable from Cuba on Tuesday reported receipts of 17,433 tons and four Centrais grinding, as compared to 16,000 tons receipts and two Centrais at the corresponding date last year. The viable production to August 24th is figured by Messrs. Willett & Gray at 2,476,000 tons. Based on a probable output of 2,550,000 tons, there still remains about 350,000 tons unsold in Cuba. Today, reports have been received that a hurricane has passed over the southern part of the island, but that no serious damage has been done.

There has been no change in prices of refined sugar, Arbuckle Bros. quoting on the basis of 5.50c less 2 per cent and the other refiners at 5.50c less 2 per cent. The demand has been very disappointing as the withdrawals against the small outstanding contracts have been only of very moderate proportions, while new business has been light. It is evident that the trade throughout the country are carrying minimum stocks on account of the proximity of the new domestic beet crop, but as these sugars will not be freely available before October, a distinct improvement in the demand should materialize very soon. Old crop domestic beets are being offered in small quantities throughout eastern territory at about 5.30c less 2 per cent.

MAY & CO. WILL CLOSE REGATTA DAY

Saturday, Regatta Day, being a legal holiday, Henry May & Co., Ltd., will close all day. Phone orders for groceries needed for over Sunday, must be placed early. IT WILL BE USELESS TO PHONE SATURDAY.—Adv.

HAWAIIAN BAND CONCERT.

The last concert which the Hawaiian band will give at Kakaako Mission before the vacation which has been granted to the band from October 1 to 31, will begin this evening at 7:30 o'clock. The following program has been prepared:

TOWSE WILL TELL COMMITTEE HOW WORK PANS OUT

Ed Towse will speak before the Promotion Committee at its meeting at 2 o'clock tomorrow afternoon. He will sketch the reasons why he considers that the Promotion Committee's work has been successful along the coast. The opinion of Mr. Towse will be carefully considered by the committee because he has been so long a member of the body that he understands all that they have tried to accomplish in the last few years. Moreover, he had not been to the coast for 10 years previous to his recent tour, and was consequently able to place coast conditions in a perspective, and see what advertising is successful and what is ineffective.

Mr. Towse will be followed by J. A. Palmer, manager of the Portland hotel and publisher of a well-known tourist booklet. Mr. Palmer has been for some time in the southern part of California, and he will suggest to the committee various sorts of advertising which might bring tourists to Hawaii from Los Angeles and surrounding cities.

A. P. Taylor, secretary of the Promotion Committee, said this morning that the chief reason that Hawaii does not draw more tourist traffic from the south is that the Los Angeles people hate to go up to San Francisco and wait a couple of days in the fog for a boat.

FUNERAL OF LATE MRS. LACK WILL BE HELD SUNDAY

At the Central Union Church, of which she was a charter member, the funeral services for the late Mrs. Sophia M. Lack will be held next Sunday afternoon at 4:30 o'clock. Interment to follow at the Niihau cemetery.

Mrs. Lack, who was 86 years of age, died Monday night at about midnight. She first came to Honolulu in 1858, coming from Australia by way of Tahiti. Mrs. Lack, besides her relatives in Honolulu, is survived by one sister living in Hamburg, Germany—the last and youngest of a family of 10 brothers and sisters. Half a dozen nephews are now fighting in the German army.

In 1865 Mrs. Lack visited her family in Germany, going and returning around the Horn. By leaving Honolulu in the autumn, and leaving Germany in the autumn, the Horn was rounded in the summer on both trips.

FIRST PUBLIC CONCERT OF THE NATIONAL GUARD

This (Thursday) evening the band of the National Guard, under the direction of Chief Musician A. A. Petersen, will give its first public concert which will take place on the foot garden of the Alexander Young Hotel, beginning at 8 o'clock. The public is cordially invited to attend.—Adv.

BANANA FLOUR INDUSTRY MAY BE PROFITABLE

Possibility of Turning Surplus of Crop into Product to Compete With Wheat Mills

From the island of Jamaica comes the announcement that recent scientific work has produced a valuable substitute for wheat flour in the dried flour of bananas, which is good news to banana growers in Hawaii.

Bananas are the most important product of the West Indies, and the war disturbance in Europe has made the prices very unsatisfactory. The result has been that a scientific effort has been concentrated upon the production of a fruit flour which costs less than wheat flour and has a nutritive value equal, if not superior, to any cereal flour.

Five hundred and thirty-seven pounds of bananas produced 123 pounds of flour at a cost of 96 cents per hundred pounds of finished product. The wholesale price quoted for the material is 4 cents a pound. This gives a value of \$5.60 for 315 pounds of banana fruit on the stem. The banana meal is mixed with wheat flour and is made into all kinds of bread and cake, and seems to be especially valuable in the production of gingerbread and ginger-cakes. Cakes such as scones can be made from the banana meal straight in place of wheat flour. The high sugar content makes the banana flour much more palatable and certainly more nutritious than the plain starch flour produced by the German government from potatoes and used as war bread.

The American consul from Kingston, Jamaica, announces that we may soon expect the making and sale of banana flour as a regular enterprise in the flour and banana world.
